

# THE ENVISANT DIFFERENCE

## Happy Summer!

It's been a high-energy season at Envisant. Our card teams are in the heat and hustle of successful migration efforts impacting our prepaid program and some of our credit clients. We're working hard to ensure everyone maintains access to the most updated processing technology for strong performance, efficiency, and growth.

At the same time, Envisant has teamed up with the Illinois Credit Union League and national industry partners — including America's Credit Unions — to seek relief from the Illinois Interchange Fee Prohibition Act (IFPA). This bill would impact ALL credit unions, banks, out-of-state issuers, merchants, and even consumers visiting the state. We're celebrating a win that will extend the bill's compliance date to July 1, 2027 as we continue to stand together for credit union and consumer interests.

Later this summer, Envisant will be hosting a virtual League Partner Meeting to spark new ideas, strengthen collaboration, and build even more momentum for success in the year ahead. A strong lineup of educational webinars is also on the horizon for the next couple of quarters. Look for more details soon.

Wishing you a fun and cool summer!

Doug Farrell  
AVP, Sales

## How Credit Union Leaders Can Chart a Smooth Course to Innovation

How to drive digital innovation by observing member needs, testing small improvements, and collaborating across teams—without losing cooperative values.

## Outsourcing: The Credit Union Advantage

Credit unions are under increasing pressure to do more with less. From fluctuating loan demand to ongoing staffing shortages, today's lending environment is anything but predictable. To stay competitive, many institutions are rethinking how they operate and turning to outsourcing as a strategic solution.

## The Envisant Difference: A Partner That Helps Credit Unions Grow Their Payments Programs

In today's evolving payments landscape, credit unions have no shortage of vendors. What's harder to find is a true partner—one that understands your goals, adapts to your strategy, and stays invested long after implementation.

## Governance in the Age of AI: Building the Right Blueprint for Credit Union Boards

AI is not a future consideration for credit unions. It is already present, often in ways not immediately visible. The question is no longer whether AI will be used. It is whether it will be used intentionally.
